

Application example

Automotive coating

CHROMASHINE® TGR20X applied to an automotive. When the automotive is viewed from the front, it is turquoise green. When it is viewed at an angle, the color changes to light blue. The design includes the CHROMASHINE® logo and QR code for our company website on the sides and rear of the automotive. (The coating has been applied to a private automotive thanks to the cooperation of the freelance announcer Ms. Renko Sakai.)
